

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director of Training
FROM : Head, Intelligence School
SUBJECT: Weekly Report

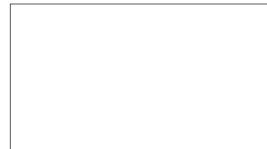

DATE: 5 June 1952

~~CONFIDENTIAL~~
~~SECURITY INFORMATION~~

1. The staff of the school has been occupied with the preparation of final evaluations of the last group of trainees and with making plans for the next course. Planning for the next course, scheduled to begin on July fifteenth, is proceeding on the basis of a six weeks' full-time course.

2. As mentioned at the staff meeting, [] and I have continued our discussions about combining the Intelligence School course and the BOC. It appears that we could offer in a six weeks' course a large proportion of subject matter now covered in the BOC and that the omitted material would consist almost entirely of subjects inappropriate for a course in general training. Two problems have arisen, however, which may make the combining of the school course and the BOC impractical. One is the different approaches to training which are held by the two sides of the Office, and the other is the definition of "semi-covert" employees as used in the report of the Working Group on Trainees. I shall explain these problems more fully in a memorandum on the results of our discussions with the TRS representatives.
